

What is your current understanding of 'Literacy and Numeracy for mathematics teaching in Ireland'?

- * My Current understanding is teachers have been asked to implement Literacy & Numeracy teaching within their specific subject, with very little guidance.
- * Currently many maths teachers ~~feel~~ think Literacy isn't their job. Also feel that Numeracy is already been taught as part of the Maths Curriculum.
- * Little or no resources/training for teachers (especially in Numeracy)
- * Many teachers do not see the value in Lit & Num integration
- * Do teachers understand the actual Concept of 'integrating Lit & Numeracy in Mathematics Lessons'?
- * Much greater emphasis on Literacy in Mathematics.
- Great insight into Lit & Num teaching within the Algebra Strand. Really enjoyed the lesson.
